5th April 2019

Dear Student,

Congratulations on being selected to be interviewed for admission to the M.Tech. programme in Communication and Networks (C&N) at the ECE Department, IISc. Our department is one among the top ECE departments in the country with faculty members who have rich academic and industry experience from leading universities and companies. The M.Tech. (C&N) programme gives our students a unique opportunity to learn from our world-renowned faculty through coursework and project work, and exposes you to cutting-edge technologies and research in the field of communication and networks.

You would have received a letter from our admissions office inviting you to an interview at IISc during 23-25 April, 2019 for admission to our M.Tech. (C&N) programme. The intent of this letter is to inform you about the interview procedure in our department, so that you can prepare well for it.

On the evening of April 22nd, you are invited to attend a 'get-to-know-us' session from 7pm to 8pm in the New Auditorium, MP Building of the ECE Department. At this event, you will get to interact with some of our faculty and students, who will give you an idea of what to expect from the M.Tech. (C&N) programme. There will also be ample opportunity for you to ask questions and seek clarifications about the programme.

Oral interviews will be held on April 23rd afternoon, April 24th full day and April 25th morning. There will be no written test. You must report to the ECE Department at the time indicated in the letter you have received from the admissions office. You may have to wait for your turn, so please keep that entire session (morning or afternoon) free of other commitments.

Your oral interview will be about 15-20 minutes long. The aim of the interview is to assess your aptitude and suitability for the M.Tech. (C&N) programme. You may be asked a few basic GATE-level technical questions to assess your technical knowledge and clarity of thought, as well as some non-technical questions to gauge your interests and suitability for the programme. Please come prepared.

I look forward to seeing you later this month.

With best wishes,

(A CHOCKALINGAM)
CHAIR, Department of ECE
Indian Institute of Science
